

Annual Well-Woman Examination

Top reasons why you should schedule your well-woman exam

Birth Control

Learn about choosing the right birth control method for you.

Cancer Screening

Learn more about breast cancer, colon cancer or other types of cancer.

Vaccinations

Get vaccinations: flu, human papilloma virus (HPV) and more.

Health Screening

Get screened for heart disease, diabetes, bone density for osteoporosis, arthritis and more.

Depression Screening

Discuss your symptoms, how often they occur, and how severe they are.

STIs Screening

Sexually Transmitted Infections (STIs) are infections that are spread by sexual contact.

Concerns About Sex

Discuss issues during intercourse, pain during sex, hormonal changes or different forms of sex.

Weight Control

Learn about body mass index (BMI), exercise, obesity, diet, surgery and eating disorders.

Menstrual Period Issues

Discuss premenstrual syndrome (PMS), heavy bleeding, painful or irregular periods.

Preconception Counseling

Discuss diet, lifestyle, medical and family history, medications and past pregnancies.

Other Reasons

Menopause, urinary incontinence, satisfying sexual relationships, infertility, drug and alcohol addiction.

Women Caring for Women

College Hill OB/GYN provides comprehensive obstetric and gynecological care for women of all ages in every stage of life. We treat every patient with compassion, while setting the standards for medical excellence through the implementation of the best clinical practices, continuing education and research.

Founded in 1985, our practice has grown to become one of the leading group practices in obstetrics and gynecologic care for women in and around the Wichita region. We have clinics in east and west Wichita and satellite locations in Derby. Our physicians and staff strive to provide convenient, complete obstetric and gynecological care in a multi-lingual setting.

As a team of 5 female physicians, our doctors appreciate and respect the trust each patient places in them during each stage in their life. They are experienced in the treatment and care of perimenopausal and postmenopausal patients. They will help guide you through the complex issues surrounding menopause, including hormone replacement and other physical and emotional changes.

Surgeries and procedures are performed in our office, outpatient surgery centers, and in the surrounding hospitals. Our doctors are trained in the latest gynecologic procedures, including laparoscopic, robotic, and minimally invasive surgeries.

We provide diagnostic services such as 2D and 3D sonography, routine gynecological exams, breast health exams, IUD placement and other forms of birth control counseling. We welcome new patients and accept most major medical insurance plans.
